

webpack2

0、webpack之简介、安装、输出日志、快捷编译(package.json 里的scripts==>npm run start)

*1、webpack之webpack-dev-server的使用

(1)、`npm install webpack-dev-server --save -D`

(2)、`"start": "webpack-dev-server --env development"`

*2、webpack结合eslint使用

https://segmentfault.com/a/1190000008575829?utm_source=itdadao&utm_medium=referral

*3、webpack单独打包css

`ExtractTextPlugin`

*4、webpack之performance(性能)

<https://doc.webpack-china.org/configuration/performance/>

*5、webpack之打包压缩BabiliPlugin

还有其他方式，比如webpack -p

*6、webpack之sourceMaps

<https://doc.webpack-china.org/configuration/devtool/>

*7、webpack之代码分离第三方代码

`DllReferencePlugin`

8、webpack之使用可视化图表进行统计分析打包过程

`"stats": "webpack --profile --json > stats.json"`

<http://www.cnblogs.com/parry/p/webpack2-Statistics.html>

9、webpack之多页面编译

10、webpack之模块热替换HMR(Hot Module Replacement)

11、文档地址: <https://doc.webpack-china.org/configuration/>
